CAREER OBJECTIVE

Motivated Computer Science undergraduate student with strong foundational knowledge in C and Python programming. Passionate about learning web technologies and currently developing fundamental skills in beginner-level Full Stack Development. Eager to secure a practical entry-level opportunity or internship in the software industry to apply my learning, build small-scale web projects, and grow under expert guidance.

EDUCATION

B.Tech in Computer Science & Engineering (AIML)

Bharat Institute of Engineering and Technology

3rd Year Student (Academic Batch: 2024 - 2028)

Current CGPA: 8.32

TECHNICAL SKILLS

Languages: C Programming, Python

Web Basics: HTML, CSS

Current Focus: Basic Full Stack Development
(Learning Phase)

ACADEMIC & PERSONAL PROJECTS

To Do List Application

Built a basic task management application using HTML and CSS. The project helps users add, track, and delete basic daily tasks while helping me practice clean frontend structuring.

Weather App

Created a functional weather application that displays basic climate details using web frontend tools and simple API integration to practice working with dynamic data.

Calculator Application

Developed a clean, responsive web calculator layout designed to handle basic arithmetic operations (addition, subtraction, multiplication, division).

CERTIFICATIONS & EVENTS

- Smart India Hackathon 2025
(Participation Certificate)
- VNR Design-A-Thon 2026
(Participation Certificate)

STRENGTHS FOR A BEGINNER

- Enthusiastic about learning new web frameworks and coding basics.
- Good foundational academic score (8.32 CGPA).
- Willing to accept guidance and work hard in dynamic teams.
